

BASIL PV

Senior Software Engineer | Python Backend & Data Engineer

basilpvofficial@gmail.com | +91 9605707906 | Kochi, Kerala | [linkedin.com/in/basil-p-v-052411178](https://www.linkedin.com/in/basil-p-v-052411178)

PROFESSIONAL SUMMARY

Strategic Software Engineer with 7 years of experience specializing in **Python backend development and scalable data engineering**. Expert in architecting FastAPI microservices, dbt pipelines, Snowflake analytics, and migrating complex legacy systems to Python to deliver end-to-end data solutions for retail and pharmaceutical clients.

SKILLS

- ETL/ELT & Data Engineering:** ETL/ELT Pipeline Design, Snowflake, dbt (Data Build Tool), Snowpipe, AWS Data Services, Python Snowflake Connector, Data Modeling, Data Warehousing, Batch & Streaming Data Processing
- Programming & Backend:** Python, FastAPI, Falcon, Async API Development, Pandas, NumPy, REST API Development, Microservices, RabbitMQ (Message Queues), CSV/Flat File Processing, Backend System Design
- Database & Data:** Snowflake, PostgreSQL, MySQL, MongoDB, SQL (Advanced, Query Optimization, Performance Tuning), SQLAlchemy ORM, Data Normalization, Indexing Strategies
- Cloud (AWS):** AWS Lambda, S3, SNS, RDS, EC2, ECS, Cloud-based Data Pipelines, Serverless Architecture, Cloud Storage & Compute
- Tools & Version Control:** Git, GitHub, Bitbucket, Jira, Postman, Azure AD, CI/CD Awareness, Agile Development, API Testing & Debugging

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Python Backend Developer | Data Engineer, Tata consultancy

Mar 2022 - Present

services

- Delivered as a Python Backend Developer and Data Engineer, providing enterprise solutions across pharmaceutical and retail domains
- Modernised a legacy enterprise middleware platform by designing and developing scalable Python FastAPI services, improving application maintainability and simplifying the overall architecture
- Designed and developed secure, high-performance RESTful APIs using FastAPI to support business workflows, system integrations, and data processing requirements
- Designed and implemented an intermediate PostgreSQL database using SQLAlchemy ORM for efficient data persistence, transaction management, and optimised database interactions
- Designed, developed, and maintained scalable ELT data pipelines using Snowflake and dbt, transforming raw data into trusted, analytics-ready datasets
- Built reusable dbt models across multiple transformation layers, implementing incremental models, modular SQL transformations, data quality tests, and documentation to improve maintainability and reliability
- Developed complex SQL transformations in Snowflake to cleanse, enrich, validate, and model enterprise data while implementing business rules for downstream reporting and analytics
- Developed Python-based data processing solutions using Pandas and NumPy to optimize legacy processing workflows and improve performance for large-scale datasets
- Integrated backend applications with Amazon S3 and AWS services to support secure file ingestion and cloud-based data processing workflows
- Collaborated with solution architects to prepare high-level architecture diagrams, API specifications, and end-to-end data flow designs for enterprise applications
- Worked closely with business analysts, frontend developers, QA engineers, and product owners in Agile Scrum teams, participating in sprint planning, code reviews, feature delivery, and production releases
- Provided production support by troubleshooting application issues, resolving data pipeline failures, optimizing SQL and dbt transformations, and ensuring reliable delivery of business-critical applications and analytics solutions
- Leveraged Python, FastAPI, Snowflake, dbt, SQL, PostgreSQL, AWS, Pandas, and Git to build scalable backend services and cloud-native data engineering solutions for enterprise customers

Python Backend Developer, Evoque Innovative Lab

Jan 2019 - Mar 2022 · Bangalore

- Architected **cloud-native solutions on AWS, leveraging Lambda, S3, and RDS for scalable computing and storage**
- Delivered **RESTful APIs** using FastAPI, Django, and Falcon for various client-facing startup applications
- Managed diverse database environments, implementing structured schemas in PostgreSQL/MySQL and unstructured storage in MongoDB
- Spearheaded streamlined database interactions by implementing SQLAlchemy ORM, ensuring efficient data modeling and query performance
- Led rigorous API testing using Postman, ensuring robust integration between backend services and frontend interfaces

PROJECTS

Enterprise Healthcare Campaign Management Platform-Leading German Multinational Pharmaceutical Company

- Developed and modernized an enterprise platform used to manage healthcare professional (HCP) engagement and campaign operations. Contributed to both Python backend development and data engineering, building FastAPI-based services, designing PostgreSQL data models, and developing Snowflake/dbt ELT pipelines to support operational workflows, reporting, and analytics.

Enterprise Retail Data Platform-Leading UK-based Retail Organization

- Developed and maintained enterprise data engineering solutions supporting retail business domains including Product, Pricing, and Promotions. Built scalable ELT pipelines using Snowflake and dbt, implemented complex SQL transformations, and delivered analytics-ready datasets to support business intelligence, reporting, and data-driven decision making.

Fintech Application Development & Cloud Deployment Platform

- Worked as a full-stack backend developer in a startup environment, contributing to the end-to-end development and deployment of multiple fintech applications across India and UAE clients. Designed and implemented database schemas (PostgreSQL/MySQL), developed RESTful APIs using Python, and built backend services from scratch to production.

EDUCATION

Master of Computer Applications, Computer Applications, Union Christian College, Aluva	Jan 2015 - Jan 2018
Bachelor of Computer Science, Computer Science, Indira gandhi college of Arts and science	Jan 2012 - Jan 2015
